Jira · Confluence · MS Project · AWS · Asana · n8n Workflow · Make.com · Figma · Lucid · Azure DevOps · Slack · Miro · Otter.ai · PowerBI

Key Achievements

Digital Transformation Lead

Rebuilt Hensal's 1980s system using **AWS, React, and Angular**, completing the full upgrade in **2 years**.

Telecom Expansion

Delivered multi-market infrastructure rollout for Digicel CVM, enabling cross-regional campaign orchestration and revenue uplift.

Agile Integration Expert

Implemented Agile practices across software teams, reducing delivery timelines by **20%** and improving sprint efficiency.

AI Process Optimization

Transformed enterprise Stabilization Review at Intellibus using **n8n + Agentic AI**, enhancing response time and operational throughput.

Financial Services Transformation

Built out CIBC's cloud infrastructure and led onboarding project, cutting sign up time by **40%** and improving compliance.

Healthcare Project Success

Reduced customer support calls by **30%** and increased web traffic by **150%** through digital redesign for a healthcare platform.

Experience

Tangent International — Cam, United Kingdom

Senior Project Manager — 06/2024 - Present

- Led strategic planning and execution for a major Caribbean telco's Customer Value Management (CVM) platform deployment and enterprise software upgrade (Evolution) across 32 markets in the Caribbean and LATAM, managing 50+ cross-functional team members through Agile delivery, UAT, and infrastructure readiness.
- Increased regional revenue by 60% by delivering a scalable campaign orchestration solution using Monday.com and SharePoint.

FirstCaribbean International Bank — Bridgetown, Barbados

Agile Scrum Master — 09/2023 - Present

- Spearheaded Agile transformation of the Digital Marketing Squad, embedding Scrum practices across a cross-functional team of writers, designers, analysts, and SMEs—enabling $100M+ in revenue from loan product campaigns through streamlined ideation and execution.
- Supported the bank's cloud migration by designing and implementing infrastructure architecture improvements—including VPN setup, DNS configuration, Zscaler integration, and firewall upgrades—boosting delivery efficiency by 35%.
- Leveraged a modern tool stack including Jira, Confluence, Azure DevOps, and Mural to drive collaboration, sprint execution, backlog refinement, and workflow transparency across squads.

BairesDev — Latin America

Agile Project Manager — 09/2021 - 07/2024

- Delivered multiple enterprise software projects for clients across the US and Canada, including SEO enhancements for Fabric's eCommerce platform—resulting in a +45% increase in search-driven revenue, translating to multi-million dollar gains.
- Led the full-stack modernization of Hensal's legacy enterprise system, transforming it into a modern web application using React and Node.js over a 2-year implementation timeline.
- Managed Agile teams of 6+ members (Dev, QA, UX, BA, DevOps), driving sprint delivery, stakeholder engagement, and iterative product releases aligned to business goals.

Experience

Double Nines
Boulder, United States

Project Manager 02/2022 - 03/2023

- Led the design, development, and deployment of a mobile app platform for Ryder Torque, improving vehicle management workflows and increasing mobile app traffic by 60% within the first quarter post-launch.
- Delivered *Ryder Gyde*, a regional roadside assistance tracking solution that reduced inbound contact center call volume by 75%, enhancing service efficiency and customer satisfaction.

Truelogic Software
Buenos Aires, Argentina

Senior Project Manager 03/2019 - 09/2022

- Increased client satisfaction by aligning 50 engineers to projects, ensuring weekly performance and alignment.
- Supported clients in auditing their project management and software development practices, delivering actionable reports and implementing strategic recommendations to optimize workflows.
- Designed and implemented tailored software delivery workflows and Support POD, improving team efficiency and project outcomes across multiple client environments.

JN Bank
Kingston, Jamaica

Project Manager 11/2020 - 04/2022

- Led BOJ compliance projects, implementing the Alessa KYC solution in partnership with vendor Symptia to detect money laundering and scam activities through enhanced UAT and monitoring workflows.
- Oversaw redevelopment of the internal *e-Money* banking app, managing business and technical teams to deliver iterative releases while reducing technical debt and improving product stability.

ZS
Kingston, Jamaica

Associate Project Manager 07/2019 - 11/2020

- Led cross-functional teams to deliver web and mobile health-tech solutions, driving end-to-end product development aligned with client objectives.
- Facilitated digital marketing workshops for a healthcare client, launching a targeted strategy that cut call volume by 30% and boosted web traffic by 150%.
- Delivered three COPD care platform prototypes with over 60% margin, enhancing patient engagement and clinical support.
- Implemented a DevOps-driven delivery model and CRM integration, improving SLA adherence and reducing operational costs while increasing platform uptime.

Digicel
Kingston, Jamaica

Business Intelligence Analyst 03/2018 - 09/2019

- Built and launched BI dashboards using Power BI to help the telecom team quickly analyze key metrics and make better decisions.
- Integrated automated Power BI dashboards to centralize revenue tracking across 23 markets and 1,000+ products, reducing reporting time and enhancing visibility across 2 regions.
- Forecasted annual budgets for 32 markets, analyzing EBIT, carrier margins, and direct costs to identify growth opportunities and financial risks for the fiscal year.

Ctrl-it
Kingston, Jamaica

Associate Project Manager 04/2016 - 03/2018

- Managed development and launch of *Buckit Rewards*, delivering real-time customer notifications and driving user engagement.
- Led planning and deployment of *Digital Know*, a facial recognition solution designed to reduce fraud across commercial banking channels.
